

FAASIK is an NGO established 9th February, 2005 to represent and address PLWHIV concerns in KENYA. This was found necessary against the backdrop that despite the numerical strength of PLWHIV, they are not well represented in the national, political, socioeconomic and development processes. As such, the FAASIK was to coordinate and mainstream PLWHIV issues in the FIGHT AGAINST STIGMA and WELLBEING. FAASIK is working within 8 provinces of Kenya.
